TRANSPORTATION SAFETY

TRANSPORTS SECURITY

A UNIQUE PARTNER

AN OVERALL VISION

TRANSPORTS SECURITY

KT2S is a company specializing in transportation security, based in Saint Martin. KT2S has chosen to build a pool of specialized expertise capable of adapting to:

- All modes of transportation (specific regulations—AVSEC/ISPS, etc.)
- The human and structural environment of its clients (coordination with public authorities, defense and security forces, institutions, and partners)
- Global and specific threats (tactics used by radical and terrorist groups, domestic radicalization, mass killings—AMOK, pandemics, sabotage, etc.)

It was born out of a partnership between GALLICE and Teranga SA, which enabled it to quickly build up solid expertise.

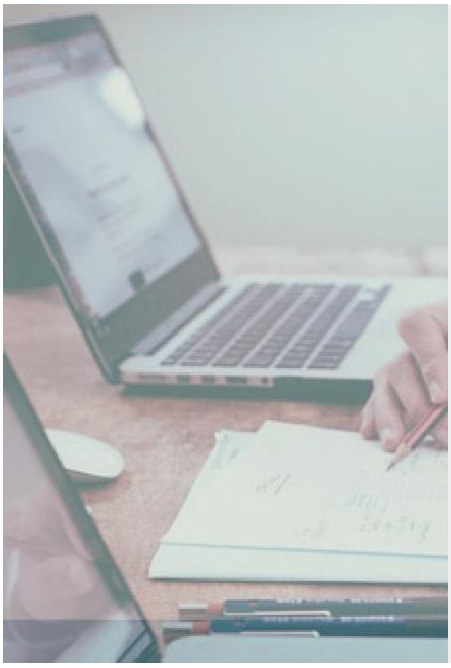

GALLICE

GALLICE, founded in 2007, is a safety and security consulting firm and solutions integrator that helps companies enhance the safety of people and property and protect their integrity, reputation, and assets. Its experience enables it to take a comprehensive view of risk and address multiple and ever-changing threats.

KT2S is a company within the GALLICE France group, established to apply GALLICE's expertise, methodology, and mindset to enhance transportation security.

EXPERTISE TAILORED TO YOUR PROJECTS

Our services for airport, maritime, rail, and land transportation hubs.

AUDIT / ADVICE / EXPERTISE

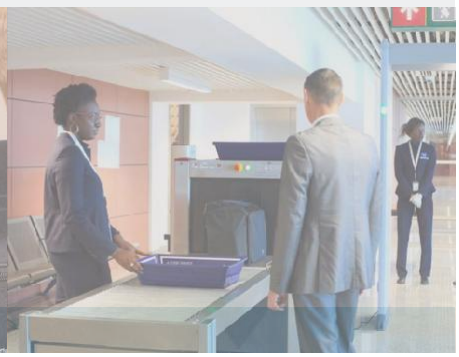

- Analysis of security and safety needs and objectives for all systems
- Identification of security vulnerabilities and weaknesses in all infrastructure facilities and projects
- Recommendation of customized technological and organizational solutions that comply with international certifications and standards
- Safety and security audit of sites, modes of transport, and maritime, rail, port, and inland waterway transportation processes
- Tailored guidance and support for building safety and security capabilities

OPERATIONS AND SECURITY

- Human/smart access control
- Surveillance (aerial/drones or ground-based) and site security
- Inspection and filtering of all types of traffic
- Explosives detection and K-9 Teams
- Crisis management and the establishment of integrated crisis operations centers
- Design and implementation of measures tailored to the level and nature of risks and threats; at operating sites, during navigation, and at port calls
- Training and deployment of security monitoring systems and Rresponse capabilities

In most cases, our proactive approach means we do not need to deploy armed personnel. However, if the threat level warrants it and with your consent, we can provide armed protection (handguns).

Legal Notice: Administrative Authorization AUT-060-2120-07-05-20210786796 and Article L612-14 of the Internal Security Code: This authorization to operate does not confer any public authority powers on the company or the individuals to whom it applies.

SAFETY MEASURES

- Passive and active protections
- Strengthening Peripheral and Perimeter Protection
- Strengthening safety and security measures
- C5I2 (command, control, communications, computers, collaboration, intelligence and interoperability : management, supervision, communications, cybersecurity, coordination, intelligence, and systems interoperability)
- Physical security

SAFETY AND SECURITY TRAINING

- Awareness-raising and training for supervisory and management staff
- Specialized training: crisis and conflict prevention, incident response, crisis and conflict management, detecting radicalization, cybersecurity, etc.
- Organizing exercises and simulations
- Promoting a culture of safety within the company
