

BS3I
BUSINESS SECURITY

Business Security International - Intelligence - Investigation

Strategic and economic intelligence

OUR VALUES

In our work on behalf of our partners, GALLICE is committed to the utmost discretion and to maintaining the confidentiality of information. GALLICE operates in strict compliance with its rigorous Code of Conduct.

OUR AREAS OF EXPERTISE

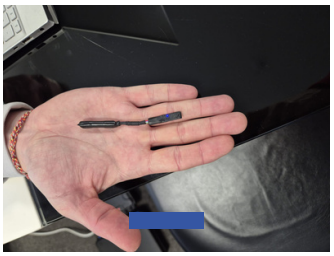

+ Investigation of fraud and counterfeiting issues; verification and confirmation of business information.

+ Corporate due diligence; background checks on individuals; assessment of key stakeholders' susceptibility to corruption; asset investigations; market analysis; and competitive and strategic intelligence.

+ Training - Consulting on economic and strategic intelligence; best practices and digital security; combating industrial espionage and data theft (for executives and employees); information security and the protection of intangible assets (for business travelers); and crisis management (project planning and execution).

+ Audit of physical asset protection (infrastructure audits); detection of listening and recording devices or tracking devices (sweeping); detection of compromises on mobile communication devices (phones, tablets, etc.).

+ Services in the form of internal and external cyber penetration tests and physical penetration tests

Today, surveillance devices are widely available and sold on a massive scale.
BS3I can detect them, making your premises safer and more secure through our "sweeping" operations.

OUR ASSETS

A network of validated high-level experts

BS3i draws on an extensive network of experts, correspondents, and partners who have been carefully selected, proven, and deployed across five continents :

- Western Europe,
- Eastern Europe and Russia,
- MENA, Sahel and Middle East (Lebanon, Iraq, UAE, etc.),
- China, India and Southeast Asia (Thailand, Malaysia, etc.),
- Central, Southern, Western Africa,
- North and Latin America

OUR EXPERTISE

Extensive experience proven in the field

Seventeen years of field-proven experience. Founded in 2010, BS3I advises and supports companies through complex studies, research projects, and audits. Its work aims to prevent and counteract dishonest and malicious acts of any kind that companies may face.

BS3I also carries out technical electronic security operations (sweeping, detection of compromises and spy devices), physical intrusion tests, and network vulnerability assessments. BS3I's work is guided by a results-oriented culture and is always conducted in compliance with the law.

Open-mindedness, clarity, adaptability, and a sense of responsibility are the qualities for which BS3i is recognized by its clients. Added to this is the trust that BS3i places at the heart of its client relationships.

OUR CAPABILITIES

BS3I is composed of specialists with backgrounds in law enforcement and intelligence, backed by extensive experience gained within government agencies and national companies. In addition to, and as a complement to our in-house expertise, we rely on a network—patiently built, tested, and validated—of experts, market and regional specialists, and auditors. This network shares our high standards and our commitment to confidentiality.

ANTONY MARCHAND
