

BS3I
BUSINESS SECURITY

Business Security International - Intelligence - Investigation

Electronic security operations

WE MONITOR

- Radio frequency environment in rooms,
- Electrical outlets, live electrical equipment,
- Telephone jacks and telecommunications lines,
- Central offices and distribution frames,
- Communication stations, telephones, etc.,
- Computer accessories,
- Electrical wiring,
- Suspended ceilings, ventilation ducts, raised floors,
- Furniture and various accessories.

OUR INVESTIGATIONS ENABLE US TO SEARCH FOR AND DETECT

- Active ambient and telephone microphones,
- Telephone interception and recording devices,
- Power-line interception devices,
- Passive wired interception devices,
- Optical interception devices (IR or laser),
- Discreet video transmitters.

DETECTING SECURITY BREACHES ON YOUR CELL/MOBILE PHONE

BS3I is equipped with a compromise detection toolkit that allows you to:

- Detect IP addresses originating from the Dark Web or malicious sources,
- Detect connections from outside the network,
- Detect connections unrelated to usual domains,
- Locate servers in suspicious countries,
- Detect commercial trackers,
- Detect intermediate alerts where the servers are considered normal.

PRIVACY AT THE HEART OF OUR CONCERNS

We help you ensure the confidentiality of your premises in a number of areas defined by:

- Procedural measures
- Room equipment
- Signal jammers and scramblers, all in full compliance with the law,

Our services will complement your existing procedures.

OUR TOOLS

OSCOR GREEN : spectral correlation analyzer. Frequencies scanned, demodulated, and located in audio and video,

CPM 700 de la marque REI ; all-frequency analyzer (AF, VLF, RF, and HF),

TALAN : telephone controller and telephone line analyzer,

Endoscopes, thermal cameras, nonlinear junction detectors, and various scanners, etc.

OUR EXPERTISE

Extensive experience proven in the field

BS3I (Business Security International Intelligence Investigation) is a subsidiary of GALLICE France, created exclusively to meet companies' needs in the areas of business intelligence, business development, protection of tangible and intangible assets, combating fraud and counterfeiting, strategy, investment, restructuring, and international expansion.

Open-mindedness, clarity, adaptability, and a sense of responsibility are the qualities that BS3I's clients recognize in the company. Added to this is the trust that BS3I places at the heart of its client relationships.

OUR CAPACITIES

We can conduct all types of manual and electronic search for eavesdropping and surveillance equipment:

- Outdoors,
- In all types of premises, including private ones,
- In vehicles.

We operate in France, in Europe and abroad.

The team consists of in-house technicians with extensive experience earned from government agencies.

OUR ACCREDITATIONS

Our research equipment is subject to authorization. Permission to possess and use it is granted by the SGDSN:

authorization n° 2403D480 ANSSI/SDE dated 25/04/2024 for the use and operation of the OSCOR 5000 (spectral correlation analyzer).

Authorization n° 2403D481 ANSSI/SDE dated 25/04/2024 for the use and operation of the OSCOR Green (spectral correlation analyzer).

Authorization n° 2403D482 ANSSI/SDE dated 25/04/2024 for the use and operation of TALAN (an IP-based telephone and telephone line monitor).

All of our assignments are carried out in strict compliance with the law.

ANTONY COUZIAN MARCHAND
